

# FibreGrid Supply GRP Grating For Stormzy & EE Gig

EE lit up London's iconic River Thames in celebration of the launch of the UK's first 5G network; marking the occasion with a 5G-powered gig with platinum-selling UK artist, Stormzy, set against the stunning backdrop of Tower Bridge.

(Stormzy performing on FibreGrid's GRP Grating)

FibreGrid's GRP Grating was used as the primary platform for the performance; demonstrating its strength and impact resistance with UK artist Stormzy, jumping and dancing during the display.

Our GRP Grating allows for some deflection, thus reducing leg fatigue caused by standing on hard, inflexible surfaces for long periods.

GRP Grating is an ideal alternative to steel grating due to its lightweight, long-lasting and durable characteristics.

Other benefits include:

- Easy to handle and install
- Low carbon print
- Low maintenance cost
- Often cheaper than steel
- Resistant to chemicals, corrosion and fire

*"GRP Grating is an ideal alternative to steel grating due to its lightweight, long-lasting and durable characteristics".*
