FABRICATE

INSTALL

Pre-engineered composite GRP Floor gratings and crossover access platforms serve as a more cost-effective, standard solution to meet customer's special requirements that would normally necessitate a custom solution.

FibreGrid's crossovers are versatile enough to solve many of the day-to-day needs of most facilities.

Whether you need a crossover for a retaining wall or a walkover for a tank, FibreGrid's pre-engineered solution is available in a variety of heights that address most standard clearances below the walkover, and will save you time and money.

Traditional material options such as heavy, expensive steel or stainless steel crossovers are often unsafe, costly to ship and install, and difficult to clean.

CHARACTERISTICS

- Excellent strength to weight ratio
- Extremely hard wearing and durable
- Lightweight
- Corrosion Resistant
- Easy to handle and install
- Low maintenance cost
- Long effective service life
- Rapid installation
- All designed bespoke to British Standards
